

# Split Strategy Addition

The numbers are 'split' into tens and ones and added separately, then they are added back together.

Show how you got your answer using the split strategy. The first one has been done for you.

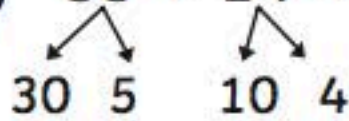

**a)**  $23 + 33 =$   

$$20 + 30 = 50$$

$$3 + 3 = 6$$

$$50 + 6 = 56$$

$$23 + 33 = 56$$

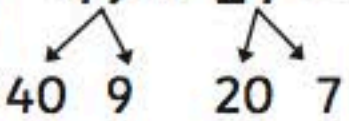

**b)**  $35 + 14 =$   

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$35 + 14 = \underline{\quad}$$

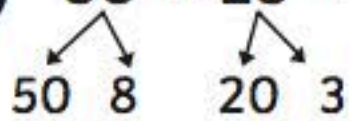

**c)**  $49 + 27 =$   

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$49 + 27 = \underline{\quad}$$

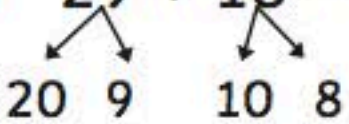

**d)**  $58 + 23 =$   

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$58 + 23 = \underline{\quad}$$

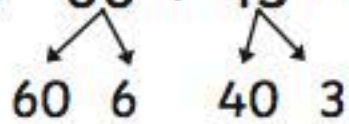

**e)**  $29 + 18 =$   

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$29 + 18 = \underline{\quad}$$

**f)**  $66 + 43 =$   

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$66 + 43 = \underline{\quad}$$
